Registration of participants for the Value-added course on 'Bio-Medical Waste Management' started at 01:45 pm. The program started with a prayer song at 02:00 pm. The inaugural address was delivered by Dr. Afzal V A (Principal). The introduction of the speaker, Dr Lakshmi Priya, Professor, Department of Oral Pathology and Microbiology was done by Dr. Binila S Babu. The session started at 02:30 pm.

Day 1 (26.11.2018, 03 hours) - Our speaker explained what bio-medical wastes are? How they are different from household wastes? The importance of handling and proper management of bio-medical waste to decrease environmental pollution.

Day 2 (27.11.2018, 03 hours) - Detailing of each of the types of biomedical waste like infectious waste, pathological waste, sharps, pharmaceutical waste, genotoxic waste, chemical waste, radioactive waste etc. were done.

Day 3 (28.11.2018, 03 hours) - The Collective teamwork of the college with the committed government support in finance and infrastructure development is an important factor for the effective disposal of BMW.

The inaugural address was delivered by Dr. Afzal V A (Principal). The introduction of the speaker, Dr Binila S Babu, Senior Lecturer, Department of Conservative Dentistry and Endodontics was done by Dr. Sreelakshmi G. The session started at 02:30 pm.

Day 1 (15.02.2020, 03 hours) - Our speaker explained what bio-medical wastes are? How they are different from household wastes? The importance of handling and proper management of bio-medical waste to decrease environmental pollution.

Day 2 (17.02.2020, 03 hours) - Detailing of each of the types of biomedical waste like infectious waste, pathological waste, sharps, pharmaceutical waste, genotoxic waste, chemical waste, radioactive waste etc. were done.

Day 3 (18.02.2020, 03 hours) - The Collective teamwork of the college with the committed government support in finance and infrastructure development is an important factor for the effective disposal of BMW.

Day 4 (19.02.2020, 03 hours) - She emphasized the color-coding systems and types of wastes to be disposed in each. Having systems is essential for proper waste segregation. The separation of hazardous and non-hazardous waste can be done by installing bins or supervising waste disposal sites. This can improve the rate of recycling, reduce costs, and reduce the overall impact of waste on the environment.
