## ORAL LESION DECODED

The Department of Oral and Maxillofacial Pathology and Oral Microbiology, in association with the Internal Quality Assurance Cell (IQAC), organized an insightful academic session titled “Oral Lesion Decoded: A Hands-On Approach for Clinicians.” The program aimed to enhance the diagnostic skills of clinicians and students in identifying and managing various oral lesions encountered in clinical practice. The session brought together faculty members, interns, and undergraduate students who actively participated in the interactive learning experience. The class focused on a practical and systematic approach to diagnosing oral lesions, emphasizing the importance of clinical examination, differential diagnosis, and correlation with histopathological findings.

## BEYOND X RAY THE CLINICAL MAGIC OF CBCT

The Department of Oral Medicine and Radiology, in association with IQAC and AADC, had conducted a session titled “Beyond X-Rays: The Clinical Magic of CBCT in Dentistry.” The program had featured Dr. Vidushi Garg, application Specialist at W&H Dental India Pvt. Ltd., as the resource person.

It focused on the clinical applications and advancements of CBCT in dentistry, offering valuable insights to participants. E-certificates were issued to all attendees.

MONDAY 29<sup>th</sup> SEPTEMBER 2025 10.00AM - 10.45AM SEMINAR HALL Dept of Orthodontics

BAAC ISO 9001 ELAC IAF @alazhardentalcollege aadc.ac.in

An Orientation Program for Postgraduate Students was organized by the Internal Quality Assurance Cell (IQAC) at Al-Azhar Dental College and Super Speciality Centre. The session was conducted by Dr. Cherian K. P., who provided valuable guidance to the newly admitted postgraduate students. The program aimed to familiarize the students with the academic structure, institutional policies, research opportunities, and clinical training available at the institution. Dr. Cherian K. P. elaborated on the expectations from postgraduate students, emphasizing the importance of discipline, ethical practice, academic excellence, and research involvement during their course of study.

# ORIENTATION PROGRAM FOR INTERNS

The Internal Quality Assurance Cell (IQAC) of Al- Azhar Dental College and Super Speciality Centre organized an Orientation Program for Interns to guide and prepare them for their clinical internship training. The session was conducted by Dr. Aby Kuruvilla, who shared valuable insights regarding the roles and responsibilities of dental interns. The program aimed to familiarize interns with the clinical protocols, patient management, ethical practices, and academic expectations during their internship period. Dr. Aby Kuruvilla emphasized the importance of developing strong clinical skills, maintaining proper patient records, and adhering to professional ethics in dental practice.

Quality you're Three Days  
**Faculty Development Program**  
Organised by: FACULTY DEVELOPMENT UNIT and IQAC - AADC in association with KUHS  
Date: 22nd, 23rd, 24th October 2025  
Venue: Mini Auditorium, Al Azhar Dental College

A Faculty Development Program (FDP) was successfully organized by the Faculty Development Unit and the Internal Quality Assurance Cell (IQAC) in association with Al-Azhar Dental College. The program was conducted with the aim of enhancing the academic, teaching, and professional competencies of faculty members. The session witnessed the active participation of faculty members from various departments, creating a platform for academic interaction and professional growth. The program focused on strengthening teaching methodologies, research skills, academic leadership, and quality improvement in dental education.

## TRIPLE 'O' SYMPOSIUM

The Triple 'O' Symposium was organized by the Departments of Oral Medicine & Radiology, Oral & Maxillofacial Surgery, and Oral Pathology at Al-Azhar Dental College.

The event was conducted on Friday, 31st October 2025, from 10:30 AM to 11:30 AM. It focused on the theme "Diagnose • Discuss • Deliver," featuring a case discussion on squamous cell carcinoma managed by hemi-mandibulectomy. The symposium brought together participants for an academic exchange, enhancing their clinical knowledge and interdisciplinary understanding.

DEC 25

# "SMILES ON THEIR MOVES"

## DENTAL CAMPS

+ Thank You

"Heartfelt thanks to the Al-Azhar Dental College team for conducting a free dental checkup at our school."

# SPECIAL CASES

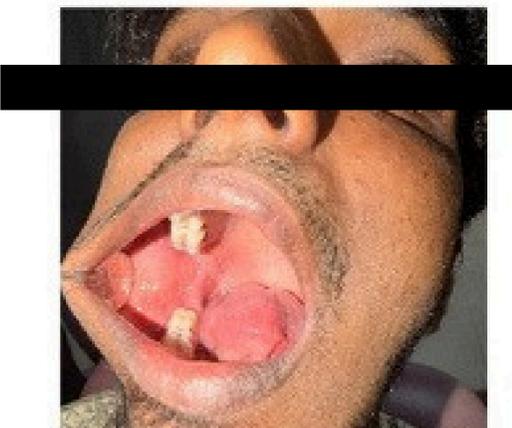

## SPECIAL CASE-1

A patient presented to the Department of Oral and Maxillofacial Surgery with pain and swelling in the lower right posterior mandibular region  
Radiographic evaluation suggested osteomyelitis in relation to right mandibular body  
Management involved , extraction of tooth 46 was performed followed by curettage and debridement of necrotic and infected bone under GA

## SPECIAL CASE-2

A patient presented to the Department of Oral and Maxillofacial Surgery with a complaint of swelling in the right posterior mandibular region  
Radiographic evaluation suggested a well-defined radiolucent lesion involving the right ramus of the mandible, provisionally diagnosed as Odontogenic Keratocyst.

## SPECIAL CASE-3

A patient presented to the Department of Oral and Maxillofacial Surgery with a history of facial trauma, complaining of pain, swelling, and facial asymmetry on the right side.

Radiographic evaluation confirmed a fracture of the Zygomaticomaxillary Complex on the right side.

A treatment was made for open Reduction and Internal Fixation (ORIF) under GA

## SPECIAL CASE-4

A patient presented to the Department of Oral and Maxillofacial Surgery with a history of facial trauma, complaining of pain, swelling, and deformity on the right side of the face. Clinical examination revealed periorbital edema, abrasions, tenderness over the zygomatic region, and restricted mouth opening.

Radiographic evaluation confirmed a fracture of the Zygomaticomaxillary Complex on the right side.

A treatment plan was made for Open Reduction and Internal Fixation (ORIF) under general anesthesia.

## SPECIAL CASE-5

A patient presented to the Department of Oral and Maxillofacial Surgery with a complaint of swelling in the jaw region. Clinical examination revealed a localized swelling with mild discomfort in the affected area.

Radiographic evaluation showed a well-defined radiolucent lesion suggestive of Odontogenic Keratocyst.

A treatment plan was formulated for cyst enucleation +Curettage+Peripheral ostectomy+Type III MMA under general anesthesia.
